

Virgilio Colomo is an architect based in Nuoro, Island of Sardinia (Italy).

He got a university degree in Architecture with a dissertation on “The Gennargentu National Park”.

He co-authored many publications on Sardinia and its nature, history, archaeology, architecture.

He is the founder of SardegnaWeb.it, a web portal about his home island.

He studies modern and contemporary art, both national and international and own a nice art collection.

He is co-founder and main member of Colomo-Marziani Architetti firm (www.colomomarzianiarchitetti.it), specialized in landscaping, interior design, sustainable architecture, public work planning.

His design process combines knowledge of history and tradition with fluency in contemporary architecture/landscape debate. He bring his mastery of construction to bear on the latest technologies and innovations.

His constructions initiate dynamic relationships between the site systems - social, economic, and ecological - that are unique to each place. His designs tailor the performance of landscapes to the programmatic needs of each project and the realistic budgets of each client.

He follows through on the real-world regulatory, economic, and constructability issues in order to realize our sustainability goals and aspirations.

He is the chief winner of the 2012 international planning competition “Tanca Manna Archaeological Park” about requalification on an important archaeological site in Sardinia, published on national media: *Il Sole 24 ore*, *Italia Oggi*, *L'Unione Sarda*, *La Nuova Sardegna*, *TSport*, *Edilizia News*, *TV-TG3 Sardegna*, *TV-Videolina*, *architects website: Europaconcorsi.com – Album Concorsi – Parchi e Giardini*.
